

BATTLE ZERO TACTICAL HEADSET BONE CONDUCTION COMMUNICATIONS

Bone conduction sensors that use your jaw vibrations to transmit and receive communications.

Can be worn with mask and helmet.

Modular changeable components.

Features:

- Heavy duty robust design with a military style push to talk (PTT).
- Strain relief cords means longer service and less down time.
- The bone conduction speakers are used for transmitting/receiving communications.
- Kevlar reinforced cable guarantees reliability.
- Has three modular components.
- Connectors are available for most radio brands.
